The Eliminator 600 SERIES: Radio Isotope Hood

**U.L. 1805
Classified**

For Safe Handling of Radiochemicals

The Eliminator 600 Radio Isotope Hood is specifically engineered and built to handle applications involving radiochemicals. It has the same aerodynamic design as the standard airfoil hood, with the added feature of a one-piece stainless steel liner and countertop with radius construction to prevent absorption of radioactive and corrosive chemicals.

The interior of the hood and integral countertop are fabricated of 304 stainless steel, buffed and polished to a smooth #4 finish. This reduces the chance of chemical buildup and simplifies decontamination. The flush-mount radiused airfoil is also type 304 stainless steel, as is the standard vertical rising sash. A combination sash is available as an option.
Five available sizes and many optional accessories meet all your design needs and the end user's application requirements.
standard features

- Powder coat finish
- Full frame construction
- Shaft drive sash
- T-8 fluorescent light with bulbs
- Flush-mount airfoil
- Interior access to light
- Full-length finger lift
- Louvered front for by-pass
- 304 stainless steel one-piece integral work surface and liner
- Stainless steel sash
- Stainless steel airfoil
