

Titan Work Bench - No Services

Titan Work Bench (TWB) gives the maximum flexibility for configuring your lab. Wall and island configurations can be readily created and easily changed as well as moved for new applications or changing space. Can be used in conjunction with suspended and mobile. Standard tables are 36" high and allow depths of 30" & 36" deep. Adjustable height units range from 30–36" high. They can be fixed or adjustable in height. In this model you can have leveling feet or casters installed. The table will support up to 1,000lbs. Order WB shelving separately. Shelf brackets are adjustable in 1" increments to allow for multiple configurations. Standard shelves are 12" or 16" deep.
